

Actsoft Inc.™, based in Tampa, FL, is a leading developer of mobile management and wireless GPS location tracking software. Actsoft™ was founded in 1996 as a custom programming firm and has quickly grown into a full mobile management solutions software house, offering web and client based mobile management solutions to businesses of all sizes all over the world with our versatile software suite.

Comet Tracker is a client based, mobile management software solution that utilizes the built-in GPS chip, in Java enabled handsets to wirelessly track worker location, record worker hours, store task information, and dispatch jobs to remote workers.

- Allows businesses of all types to easily and affordably monitor workers in the field
- Provides features to improve business operations; while seeing a very fast return on investment.

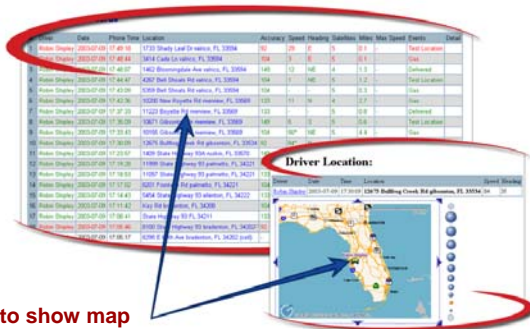

**“We chose Comet Tracker over the competition because of the user friendly interface and ease of configuration with the GPS-enabled phones our field technicians’ use. This allows us real-time administration of our personnel on jobs – especially for determining which ones are best located for emergencies”**

Mat Wahlstrom,  
Operations Manager,  
Roberts Electric  
Service, Inc.

GPS-based wireless business solution application that allows customers to track and monitor valuable resources

- Web Based Client Application
- Uses a map centric GUI
- Tracks with Navteq maps, satellite images & Google Earth
- Remote data entry
  - Bar Code Scanning
  - Pictures
  - Signature capture
- Time and Attendance
- Backend integration specialists

**“The GPS functionality of Comet Mobile Worker revolutionizes our mobile workforce by allowing us to dispatch efficiently and price our orders quickly and correctly. I feel as though Comet Mobile Worker was designed with my operation in mind.”**

Bill Rissler,  
Fleet Operations,  
Pacific Delivery Svc, Inc.

Basic, easy to use tracking application, locate field workers any time, anywhere

- Detailed, robust mapping functionalities
- ASP Independent
- iDEN and CDMA
- Cost-effective application with no software on the phone

Multi-functional software suite: easily manages the service lifecycle, from the initial service request to the service call completion

- *Schedule recurring order (monthly/weekly)*
- *Create customer invoice & worker payroll into QuickBooks®.*
- *Collect field data manually or via Bluetooth™ barcode scan*
- *Identify job costs to bill customers accordingly*
  - *link together rate plans, services and lookup items to create a flexible pricing set up*
- *Dispatch work order to an individual or a group of workers*

Innovative, patented, on demand system that monitors and controls vehicle and engine activity with GPS Tracking capabilities.

- *Idle limiting - automatically shuts down engine after pre-determined idling time is exceeded*
- *Sends out an alert to the dispatcher and driver should a fault occur.*
- *VEM can shut down a vehicle engine REMOTELY from the dispatcher's computer*

#### Benefits

- *Reduce engine failures*
- *Save fuel costs by idle limiting*
- *Save jump starts by protecting the battery*
- *Provide valuable management information on the vehicle and driver performance*
- *Reduces overall wear and tare on the vehicle; increasing longevity and maintenance savings*

Active GPS ankle bracelet with embedded alcohol sensor for early release, pre trial release, long term offenders, including sex offenders.

- *Historical GPS & breadcrumb trail for all offenders*
- *User Definable Parameters*
- *Enhanced Dynamic Exclusion Zones*
- *Automatic e-mail alerts for violations of exclusion zones*
- *NAVTEQ Quality Mapping*
- *Street Level Mapping or Satellite Imagery*

**"The Vehicle and Engine Monitoring System will be put on every truck I buy because it pays for itself in fuel savings in less than a year".**

Tom Johnson,  
Vice President  
Distribution Services,  
Lepage Bakeries

**"Before using the Actsoft solution, we spent time and money driving around to ensure offenders were in compliance. Now we know where offenders are and receive automatic alerts when violations occur. This makes my operations more efficient and saves me money, while giving me constant visibility at my fingertips."**

Christina Miller,  
Vice President,  
Ohio House Monitoring
